

TENNESSEE VALLEY AUTHORITY  
  
AMENDMENT FOR  
  
VOLTAGE OPTIMIZATION PROJECT  
  
CVR REQUEST FOR PROPOSAL  
Released June 23, 2014

THIS AMENDMENT, effective July 31, 2014, between CVR RFP Participants, hereinafter called "Participants", and TENNESSEE VALLEY AUTHORITY, hereinafter called "TVA";

IN CONSIDERATION of the active participants hereinafter contained, the CVR RFP to be modified as follows:

- The Voltage Optimization project pertaining to the CVR RFP, released June 23, 2014, is extending the proposal deadline to October 24, 2014.

Milestone	Date
RFP Release Date	June 23, 2014
Intent to Bid Form Due	July 14, 2014
Open Window for Submitting Questions	June 24 – October 7, 2014
Responses to Questions	July 7, 2014 – October 17, 2014
Proposal Due Date	October 24, 2014, 11:59 p.m.
Evaluate Proposals and Award Contract(s)	January 15, 2015 (estimated)

- TVA will allow a CVR RFP responder to include an equipment proposal with their RFP, so long as these expenditures are necessary to implement the program effectively and the responder is ultimately selected by TVA for participation in the program. Proposals submitted without the need for such reimbursement may be evaluated at a higher level as the program would be implemented at a lower cost to TVA.

IN WITNESS WHEREOF, TVA has executed this amendment as of the dates written below.
